M<sup>2</sup>: 0

Price: 699,000 €

Status: Sale

Property Type: Land

Reference: R4782619

Publish date: 12.06.25

Overview: Completely flat development land with an approved and flexible project for 31 homes | 8,191 m<sup>2</sup> next to the Ronda-Campillos highway, opposite a sold development, 20 minutes from Ronda and 1 hour from Málaga and the Costa del Sol Strategic location with immediate access and proven demand Completely flat development land measuring 8,191 m<sup>2</sup> with an approved project for 31 homes, located in Cuevas del Becerro, next to the Ronda-Campillos highway, ensuring quick and direct access. Just 20 minutes from Ronda and 1 hour from Malaga International Airport and the Costa del Sol, it offers a perfect combination of connectivity and a residential setting. Right in front of the plot, approximately 500 m away, a development of semi-detached houses has been developed and sold quickly, confirming local demand and the viability of new developments. Approved and flexible project to adapt to any vision Although the 31 plots have already been registered and approved, the planning allows for modifying the layout of the homes to design a more exclusive and differentiated development: for example, placing the houses around each other and creating a large central garden with a pool and common areas, or other

concepts that boost sales. Ideal Mediterranean climate for year-round living Sunny, warm summers (max. approx. 28°C) and mild winters (min. 2-5°C), perfect for a comfortable and attractive residential development for both the national and international markets. Natural setting with high added value Surrounded by the Sierra de Viján and Cerro de los Tercios, with springs like El Nacimiento, waterfalls, and hiking trails, a setting that brings quality of life and ecological appeal to the project. Key Competitive Advantages  Completely flat land, which makes construction cheaper and faster  Project approved and integrated into the General Urban Development Plan (PGOU)  Urban planning flexibility: possibility of redistributing housing and common areas  Utilities at the plot level (water, electricity, sanitation, telecommunications)  Immediate access from the main road  Mild climate and attractive natural surroundings  Scarcity of developable land in the area  Proven demand: neighboring development sold quickly  Expanding market with interest in new construction Safe investment with high capital gains potential The combination of scarce developable land, proven demand, design flexibility, and legal security makes this plot an exceptional opportunity for developers, builders, and investors looking to launch a project with a quick return and market differentiation. Request the complete documentation and plans to develop your development with confidence and commercial appeal.
